

I object to BROADBAND OVER TELEPHONE LINES. This mode of operation WILL cause interference to licensed radio services, such as the Amateur Radio Service. The Amateur Radio Service provides the best FIRST RESPONSE to ALL emergency conditions that affect the general public. Willful interference to these emergency communications is in violation of FCC Rules and Regulations. If telephone and power companies KNOWINGLY add BROADBAND DATA to their regular services, THEY are KNOWINGLY CAUSING WILLFUL INTERFERENCE...!
Thank you for your consideration...
